

NOTES FROM NATURE - GEOREFERENCING EVENTS
WeDigBio • October 8–11, 2026

LOVE MAPS? INTERESTED IN BIODIVERSITY?
HELP US PUT MUSEUM SPECIMENS ON THE MAP!

WHAT IS GEOREFERENCING?

Georeferencing turns written descriptions of places into geographic coordinates (latitude and longitude). Many museum specimens were collected before GPS was widely available. Your help allows this valuable locality information to become mappable data for biodiversity research.

Our current project focuses on plant specimens from the California Academy of Sciences. No California geography expertise is needed!

FOUR DAYS • FOUR EVENTS

✓ No experience needed ✓ Free and open to everyone ✓ All you need is a computer + internet access
✓ Join one event or all four

THU • OCT 8

BEGINNER'S COURSE: Georeferencing Museum Specimens

12–2 PM Pacific • 3–5 PM Eastern

Learn the basics and try the new Notes from Nature tool.

Register: <https://us06web.zoom.us/meeting/register/47gltgSCeltZByhll0pw>

FRI • OCT 9

GEOREFERENCING HANGOUT

10–11 AM Pacific • 1–2 PM Eastern

Drop in, georeference together and join in some fun activities.

Register: <https://us06web.zoom.us/meeting/register/HBO32XXMQQ-z63WbXL1r4Q>

SAT • OCT 10

GEOREFERENCING HANGOUT

9–10 AM Pacific • 12–1 PM Eastern

Drop in, georeference together and join in some fun activities.

Register: <https://us06web.zoom.us/meeting/register/s9ykMWYIQQKICpQzBC1wFA>

SUN • OCT 11

GEOREFERENCING HANGOUT

2–3 PM Pacific • 5–6 PM Eastern

Drop in, georeference together and join in some fun activities.

Register: https://us06web.zoom.us/meeting/register/8Kkdh9U_R1mMAPyZXsF1gA

Prefer to work on your own? All training materials will be available closer to the event:
